PERSATUAN PEMULIHAN ORANG-ORANG
CACAT SELANGOR & WILAYAH PERSEKUTUAN
(PPOC)

- ▶ The Society for the Rehabilitation of the Disabled Selangor & Federal Territory is a charitable organization founded in 1972.
- ▶ YAB Tun Dr Siti Hasmah binti Mohd Ali is the Patron of the Society.
- ▶ Rumah Insaniah Tun Dr. Siti Hasmah was established on 12 March, 1988 to accommodate the disabled with shelter, food and lodging while they participate in the rehabilitation programs.

The care and services :

- ▶ To provide hostel facilities and value added services to the disabled.
- ▶ To assist and to educate the disabled on the importance of living independently so as not to burden their family and loved ones.
- ▶ To provide opportunities for social exposure by participating in activities organized by welfare agencies, societies, institutions as well as individuals.
- ▶ To provide employment.

Services / Training Provided by the Centre

Tailoring: Items such as cloth bags and curtains are sewn by our residents, under the strict supervision of our sheltered workshop supervisor.

Assembly of parts: Toys, games and party packs are assembled by our residents.

Packaging: Residents package items for use such as in the beverage or hospitality industries.

Simple training in computer: Basic tutorials are offered to residents who show keen interest in computers.

Arts & Craft: Residents are trained to assemble various arts and crafts items.

Preparation and cooking of meals: Under supervision, residents are trained to prepare food items and practice hygiene standards in the kitchen and dining areas.

Fitness exercise: A trainer supervises the residents when using the equipment.

Sports & recreation: Residents who show a keen interest in sports activities are supervised by trainers to international performance standards. The Society has an active archery club whose members include able and disabled sports men and women.

PERSON IN-CHARGE
MS. AMY

1ST OF OCTOBER

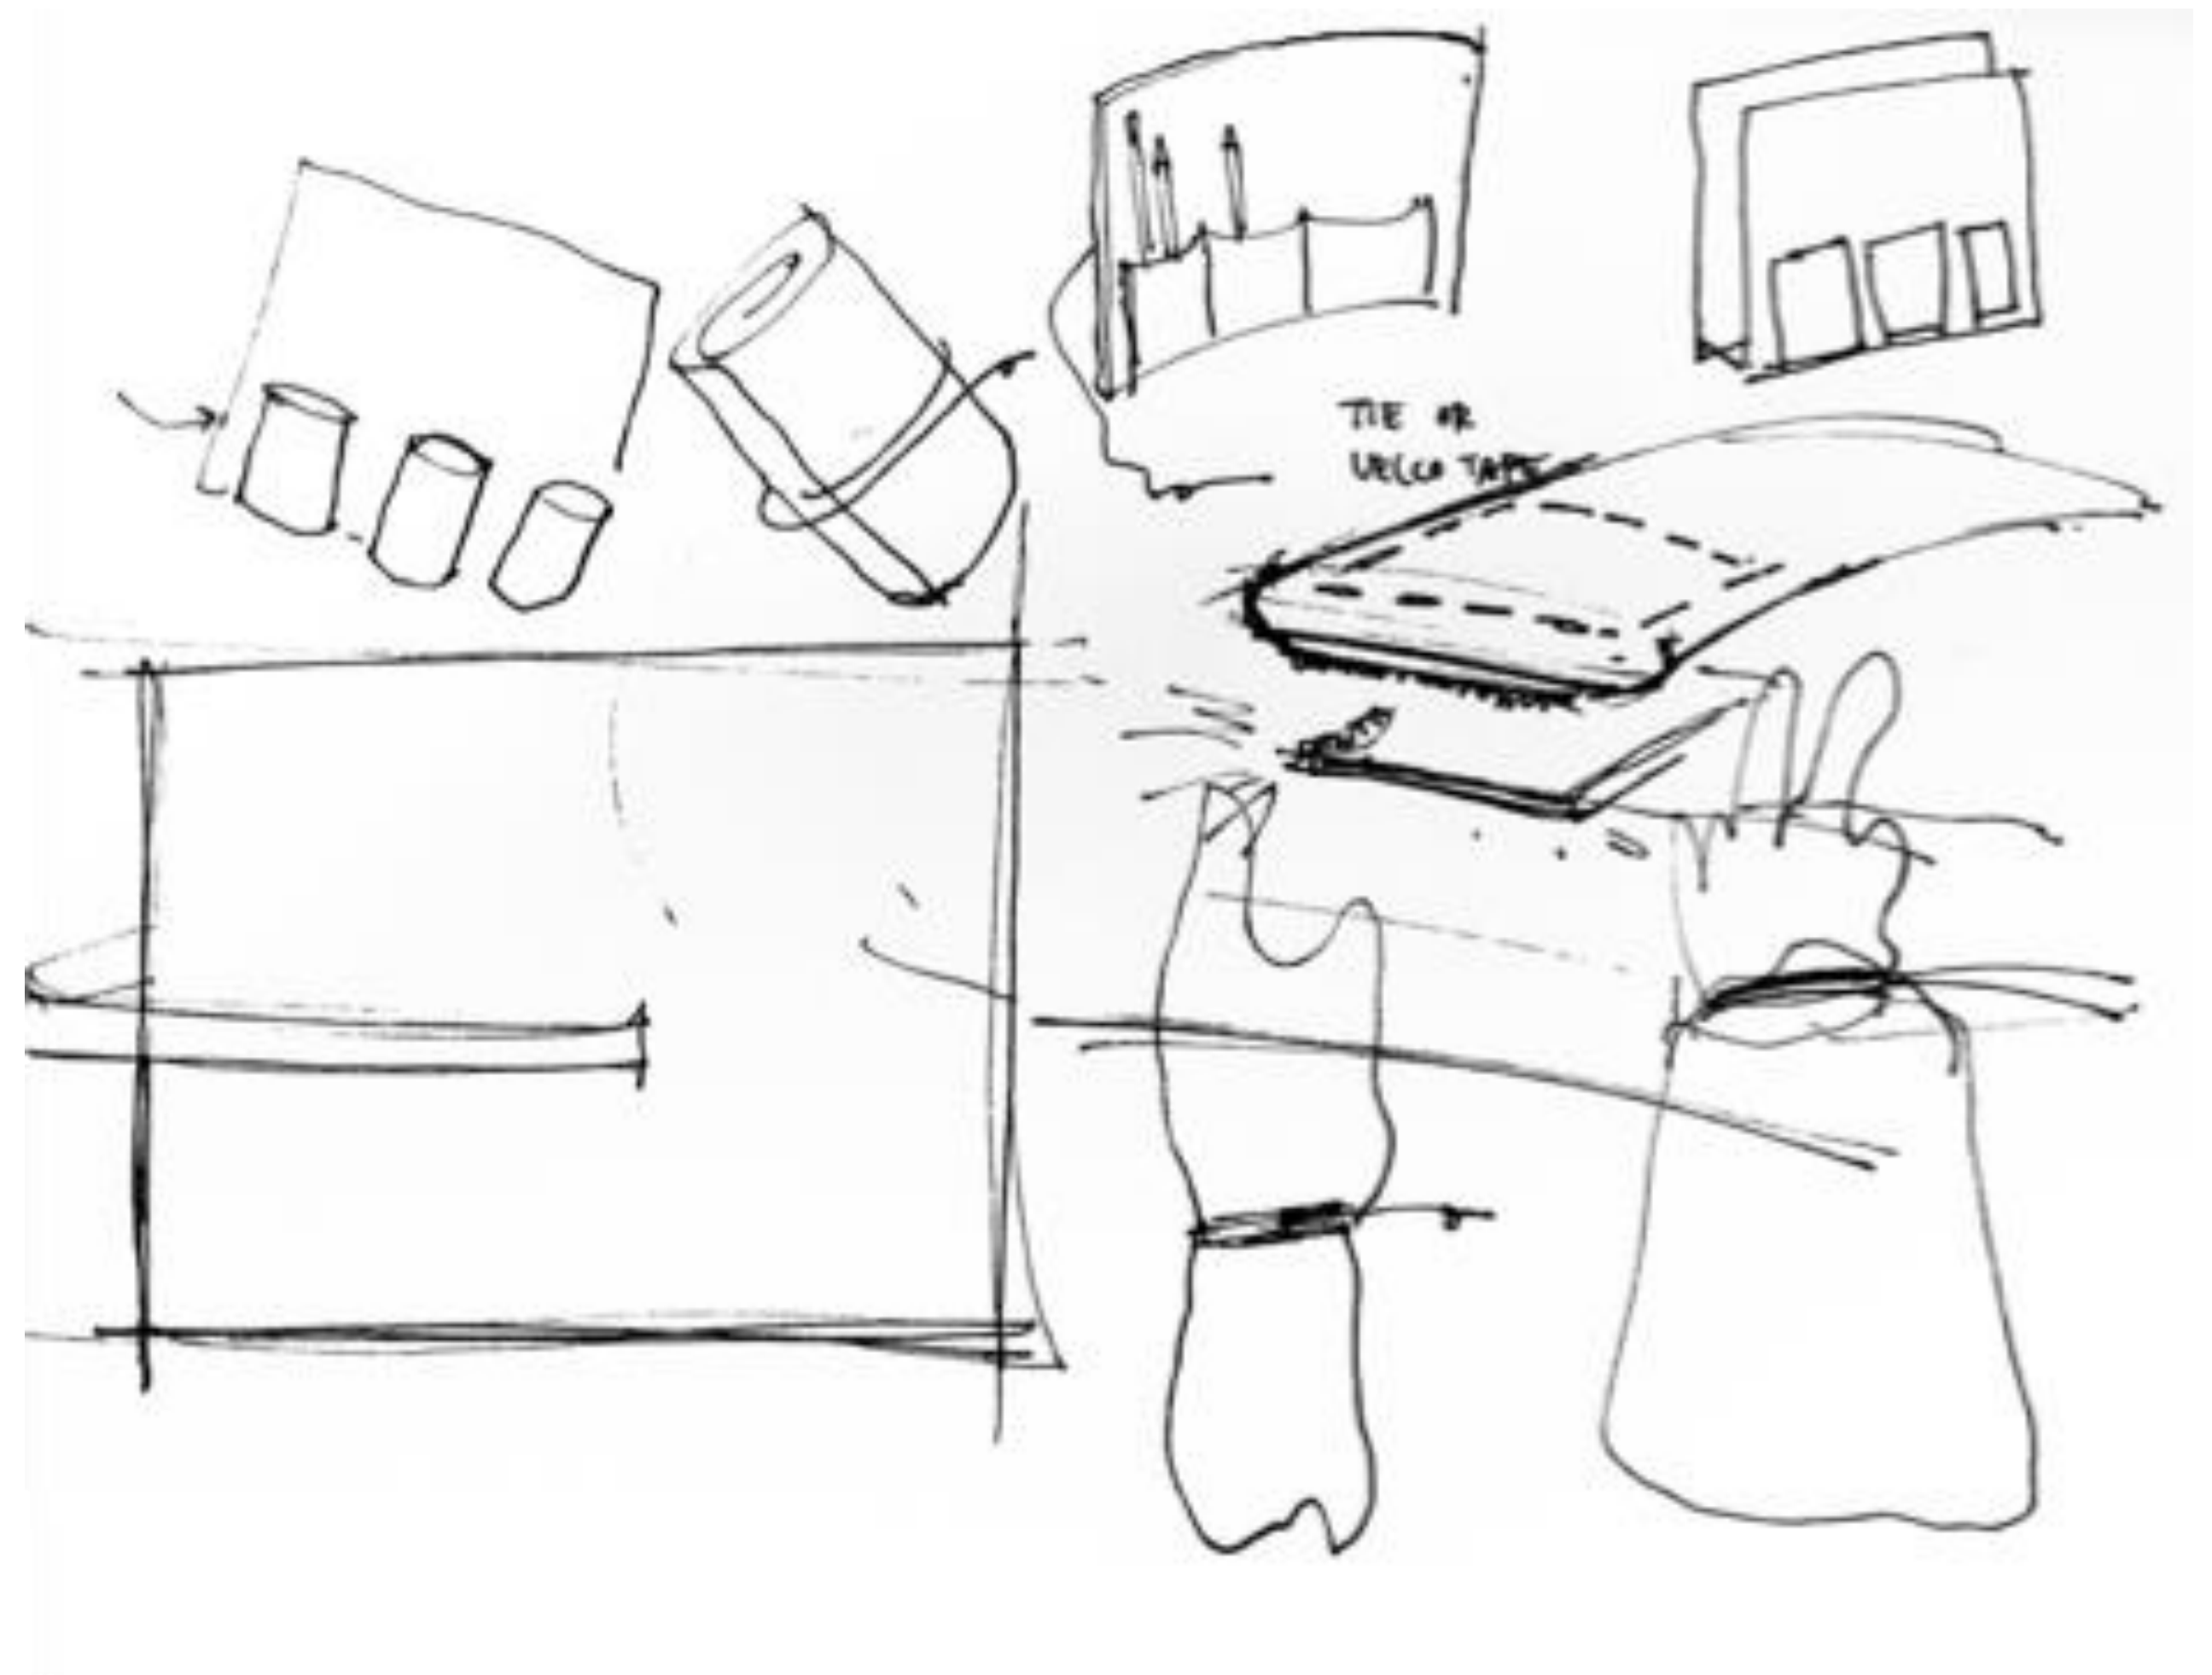

FIRST VISIT

BEFORE WE GO...

- ▶ Researched about ideas for potential products.
- ▶ Discussion about the products.
- ▶ Looked at the videos of ideas that Miss Noorseah has uploaded.
- ▶ The first idea that we came out with is a pencil case because it is a product that people would usually use and the instructions are simple and easy to do by the residents of PPOC.
- ▶ After we decided what product we would be doing, we started drafting out some blueprints/schematics.

- ▶ Miss Amy gave a space for us to work which did not disturb the residents of PPOC when they are working.
- ▶ Proposed our ideas to Miss Amy but she was a bit busy. So, we used that time to try out some of our theories on how to make a pencil case.

- ▶ The fabric that we used was chosen from the extra fabric that Miss Amy gave us, we mainly picked out the fabrics with plain colour so the final product would not be so fancy.
- ▶ The first step that we did was we measured and marked on the fabrics then passed to another group for cutting and sewing by hand.

- ▶ After completing our draft products and Miss Amy was free, she then helped us to resew the pencil case using the sewing machine.
- ▶ After figuring out all the instructions, we drew them into pictures as a pictorial record for Miss Amy and the residents of PPOC.

INSTRUCTIONS ON HOW WE CREATE OUR PENCIL CASE

SEWING OF THE PRODUCT

7TH OF OCTOBER

SECOND VISIT

PREPARATION STAGE

- ▶ Think of the ideas before going to the center.
- ▶ Make appointment with Miss Amy for the next visit.

- ▶ Shop for ribbon and potpourri flowers

PROCESS STAGE

SELECT FABRIC

MEASURE & CUT THE FABRIC

SEW THE POUCH INSIDE OUT

CRUSH THE POTPOURRI FLOWER

PUT IN THE CRUSHED
POTPOURRI FLOWER

VIDEO OF US SEWING

TIE THE POUCH WITH RIBBON

21ST OF OCTOBER

THIRD VISIT

BUT BEFORE THAT...

Planning to come up with something

- ▶ Simple
- ▶ Useful
- ▶ New
- ▶ Profitable

After some discussion and brainstorming,
finally we came out with an idea

A CABLE ORGANISER

*Diy Cord Keeper
tutorial*

leafytreetopspot.blogspot.com

21ST OCTOBER, FRIDAY

- ▶ well-prepared, ready to try out new idea
- ▶ learn to use the mini sewing machine

AFTER A FEW ATTEMPTS

ended up getting the right size to tie a phone cable or a earphone cable perfectly

FOLLOWED BY THE VELCRO STRAP BEING CUT AND SEW ONTO THE FABRIC TO FINISH UP THE PRODUCT

AND IT WORKS JUST FINE!

Went proposed it to Miss Amy

BUT SADLY

- ▶ She shot our idea down and said that she doesn't think that anyone would want to buy the product, and that she will only make them if there is a quantity of order that came in
- ▶ We felted it is kind of unfair of her to make assumptions like this and so to prove our idea really works, we went test market in our very own class.

11TH OF NOVEMBER

LAST VISIT

- ▶ Measure the fabric sample to the correct size for the cable organizer
- ▶ For easier job for cutting out the fabric we cut out one piece of paper roughly around 15mm X 10mm for stencil
- ▶ We use pen to draw the outline and then cut out the fabric accordingly

- ▶ Fold the fabric into half and let Miss Amy to sew by using the sewing machine
- ▶ We flip the fabric inside out and then next step Miss Amy will sew on the Velcro onto the fabric strip

HELPING OUT MISS AMY

- ▶ Fold the fabric into half and let Miss Amy to sew by using the sewing machine
- ▶ We flip the fabric inside out and then next step Miss Amy will sew on the Velcro onto the fabric strip

- ▶ Miss Amy taught us to use the vertical cutter for cutting the woven fabric
- ▶ Learn how to work as a team
- ▶ Work better, faster and efficiently when in a team

PROBLEM WE FACED

- ▶ We got the wrong information on what was expected from us. They preferred ideas instead of mass producing a product.
- ▶ We have no experience in sewing or making handcraft so we did a lot of experimenting at the start.
- ▶ We weren't allowed to use the sewing machines there so we had to manually sew on all our draft products.
- ▶ Miss Amy had no faith in our ideas, she keep rejecting all of our proposal so we had to work hard to prove her wrong.
- ▶ Communication problems, Miss Amy mainly speaks Cantonese so only two of us are able to communicate with her well.

CONCLUSION

Things we help out with:

- ▶ Giving a total of 6 ideas to Miss Amy which she can later on use to mass produce.
- ▶ Helped out around the center with a few things.
- ▶ Earn a total of 100 ringgit by selling the cable organizer.

Things we learned:

- ▶ We improved on our sewing skills and handicraft work.
- ▶ We learned to be patient when talking to people there.
- ▶ We learn to have better teamwork and divided the workload based on personal skills.

Reflection

▶ Lim Han Yuan

I think this module has really helped me and my group mates to learn the importance of team work, responsibility, planning and always thinking ahead. We faced many problems which has really discourage us, throughout the process of our project/ service but learning to see things to the end and completing what we said we would do by coming together as a team to face the problem. We also learned that not every person we will meet in the future will be nice and easy to work with but we still have to do it and put our ego aside. All in all, we left the center happy with what we manage to finish within our 20 hours of community service.

Reflection

▶ Nicosius

Overall this Community Service Initiative Module help me to be more aware on my surrounding social society. It help me to develop more on my communication skills, team work and problem solving. It also help me to be aware that there are community that needs help so they can do what they do.

Reflection

▶ Wai Suk Sian

After few visits to the center, I had widen up my knowledge. I also get to learn the process of producing a product. It actually requires time and effort to make a good product. Moreover, get to improve my sewing skills. My patient had slowly increase as talking to disable people have to be very gentle and soft to them. Beside that, we team work is getting stronger each time as most of the time we work and solve the problems together. We also get to trust each more. Last but not least, we are very happy with all of our products and our distribution to the center.

Reflection

▶ Emily

Through involving myself in 20 hours of community service activities, i found myself improved in terms of creativity and hand skills, where we need to design a simple yet profitable product with the existing material they have at the PPOC center and to make it out by our own hands. Furthermore, this module has helped me developed my personal as well as social responsibility, as we're exposed to community needs and experienced caring for people that are in need, while learning about the resources available for the people to revitalise their communities. Other than that i have also learnt to be more patience in everything i do, either it's towards things that i do or over people. Last but not least, i have learnt to appreciate more in life as I considered myself as the lucky one. I'm born in a healthy body therefore i have the responsibility to help the less fortunate ones in the world.

Reflection

▶ Vivian

I would like to thank Miss Noorseah to give me this chance to complete my first community service in university life. After this community service, I learned a few lessons that I won't be learned during my course. First, a good teamwork can produce a better result. I was glad that my team always discusses before starting working and separates our works nicely. Besides, I learned to be more patient to face everything problems and everyone. I noticed that we should give more patience and care for those disabled people. They need more care from other people. I also learned the basic of the sewing skills although it's quite hard. After this community service, I need to be glad everything I have now and I will help more disabled people who need our help.

Reflection

▶ Jonathan

During the visits to the PPOC, I have learned how to work well in a team, both with my group mates and also the residences or supervisor in charge. Teamwork establishes strong relationships among us. Despite there were some occasional disagreements, I learned how to control my patience, emotion and still enjoy working together and shares a strong bond. When it comes to having discussion with my group mates, it enhances my communication skills as well as critical thinking skills to come out with an idea. In conclusion, this module exposes me to diversity and multiculturalism, builds relationships and social connectedness with peers, adults, and activists sharing a cause, gave me the ability to develop an increased sense of social responsibility, introducing me to the society and a heart for giving back when helping others who are in need.

Reflection

▶ Eu Jun

Throughout this module what I have learned is teamwork, passionate and responsibility toward the community around us. Never in my wildest dreams would I have even begun to imagine that community service could be such a rewarding experience. Community Service is important for many reasons. Taking part and volunteering teaches compassion and understanding. One of my favorite things about community service is that there are opportunities and choices right in your very neighborhood. I have learned how to work in a team so that we can deliver the faster and better job. In addition, responsible for the community is the greatest achievement that we have throughout this module.
